Shipping weight	250 lbs.	380 lbs.	450 lbs.

Sealer discharge conveyor adjustable up and down with a crank handle

The PPG sealer and tunnel line is our most popular production shrink wrap system, capable of wrapping up to 15 packages per minute. Standard equipment includes impulse micro knife sealing blade with built-in temperature compensator to insure uniform sealing quality. Our shrink tunnels come with a generous height entrance, adjustable belt speed and fully re-circulating air chamber with live roller rod conveyor

SPECIFICATION	PPG 1721 COMBO	
	(sealer)	(tunnel)
Power Supply	220V - 1 PH 50 amp	
Sealing Dimension	17"L x 21"W	-
Sealing device	Micro knife	-
Maximum film width	20"	-
Tunnel entrance dimensions	-	17" W x 28"L x 10"H
Power take away conveyor (variable speed)	YES	
Film perforator	Included	-
Machine Dimension	53"L x 25"W x 40"H	40"L x 29"W x 67"H
Shipping weight	600 lbs.	

This system also comes in an auto cycling pneumatic version **PPG 1721 COMBO PN**
The specifications are the same as the PPG 1721 COMBO with an adding of 1CFM @ 80 psi air consumption

This PPG COMBO series is built of a unique single-frame construction fully adjustable: both sealer and tunnel come with a crank handle to adjust the height; thanks to this feature the package will flow evenly from the sealing belt through the tunnel. The sealer is also adjustable front and back, allowing the package to be centered into the tunnel for a better quality shrink.

Our PPG shrink tunnels series feature a fully re-circulating air chamber with live roller rod conveyor. The PPG 1622 COMBO series come equipped with casters.

Warranty

A limited warranty by Pro Pack Group covers each system for a period of one year. Specific details regarding this warranty are available from Pro Pack Group and its authorized distributors.
