

Hand strapping systems

We are proud to introduce our new line of strapping tools. They all can run either polypro or polyester strapping. The kit comes with a battery, charger and manual. Please fill out the warranty card in the box when you get the tool and send them back to us. The 22 line is adjustable from 1/2 inch to 5/5 inch and the 26 line has the option of 3/4 inch strap also. When ordering, please state strap size to be used as we will set it up and test them before they are sent out to you.
