Overall dimensions	32.5" X 24" X 41.5"
Machine weight	290 lbs.
Shipping weight	320 lbs

NEXMAIL is the right system to package newspapers, catalogs and all kind of publications or documents. NEXMAIL works with polyethylene single wound film roll (maximum thickness 1.25 mils). The film is inserted in a width adjustable forming head, which refolds it on itself and form a bag around the product. A longitudinal and a transversal sealing bar make the closing of the bag.

- Self adjusting booklet length through photocell
- Independent sealing bars with electronic control for cutting temperature
- Booklet automatic tracking
